

ORIGIN'S EXCLUSIVE SERUM PRESETS

SUBPAC OPTIMIZED™ PRODUCTION TOOLS

Involved with California D&B since the beginning, his unique take on the sound and ability to gain any crowd's trust has him playing some of the largest dance events in the Western U.S. including Nocturnal Wonderland, Lucidity, Control at Avalon, and numerous clubs and parties over the past year. His performance sound is D&B, Halftime, and Abstract beats, morphed, rearranged, and manipulated using Ableton Live. His production prowess has found him releasing music with artists such as Photek, Gridlok, Salva, Flinch, UFO!, and George Clinton, among others. Taking a 6 year hiatus to push his successful Kuru project, 2015 marks exactly one year since Origin's return to the sounds of D&B, and the future looks bright.

Origin, an Ableton Optimized Trainer that has taught as schools such as SAE, Relativity and others, has created Serum Presets for the SUBPAC community.

Details:

- 5 presets
- 5 Loops at 128bpm
- 5 One shots
- Serum Ableton Project
